

Insignis Powered Standing Frame

For more than 20 years, the Insignis Powered Standing Frame has been providing significant therapeutic and psychological benefit for people in wheelchairs or who have difficulty standing or who cannot stand at all.

The Insignis Powered Standing Frame is designed to:

- Be highly practical, straightforward and comfortable to use
- Ease strain on carers
- Benefit clients of all standing ability (even those who cannot stand unaided)
- Fit easily in homes (easily manoeuvrable, substantial piece of equipment)

The Powered Standing Frame includes:

- Steel lifting arms to lift the user in an arc (minimise strain on knees & hips)
- A padded, cushioned knee support
- A chest rest and back support to keep the torso in a straighter posture
- A table top (so many tasks can be done in the standing position)
- A metal frame making it a compact and strong piece of equipment and easy to keep hygienically clean
- A reliable motor so the Standing Frame will last for many years

The Powered Standing Frame was designed in Scotland and is made in the UK, making support for the frame and for clients readily available.

Benefits of standing therapy

- Improves posture and muscle tone
- Aids function of internal organs (e.g improves blood supply, aids digestion)
- Helps prevent contractures and pressure sores
- Aids maintenance of correct bone loading
- Psychological benefits

Dimensions

The Standing Frame comes in two sizes: standard 18inches (45cm) wide & larger 22inches (55cm) wide

User weight limit is 127kg (20 stones or 280lbs)

As the Frame is manufactured in the UK, special adaptations can be easily added, such as a raised floor for users of smaller height.

Buying the Insignis Powered Standing Frame

Two options: Purchase outright or lease on a short-term basis
